Description

Long term:

It would be cool to have a RSS of the updates of the group #groupA in Kune. First we would need a stream of updates of the group (last docs modified, events added, etc). If the stream can be read as RSS feed, then it automatically can be tweeted, can be inserted with a plugin in a Wordpress, etc.

The "last docs modified" is similar to what the Home Space shows for the user... if it could be presented by group...
