Description <ul style="list-style-type: none">- Alice visits her own profile page. It shows "buddies (50)" because she has 50 friends.- Alice visits Bob's profile page, with hidden buddies. She sees it shows "buddies (50)" even though she cannot see them (as they are hidden). She thinks Bob has 50 friends.- Alice visits Carols's profile page, with public buddies. She sees it shows "buddies (14)".- Alice comes back to Bob's profile page, with hidden buddies. She sees it shows "buddies (14)" (!?) <p>The buddies counter of the hidden buddies is just the last one shown, it seems. I guess it should show "buddies (?)" always.</p> <p>I could handle this issue if it's feasible.</p>
