<b>Resolution:</b>			
<b>Description</b> <ul style="list-style-type: none"><li>- Alice sends an invitation to her own email</li><li>- Alice receives the email inviting her to Kune.cc</li><li>- Alice clicks on the link and kune.cc opens</li><li>- She was already logged in.</li><li>- She sees a message saying that "Alice" invited her, so she may want to make Alice her friend</li><li>- Alice accepts</li><li>- Another message appears, saying that Alice is inviting you to be her friend...</li><li>- Alice accepts</li><li>- Alice goes to her buddy list and sees herself as a buddy!! (check <a href="http://kune.cc/#!samer">http://kune.cc/#!samer</a>, the last friend is "samer")</li></ul> <p>Some needed checks here:</p> <ul style="list-style-type: none"><li>- If the person that invited me to Kune is myself, don't offer friending</li><li>- If somehow I manage to offer friendship to myself, I shouldn't be able to accept (automatically rejected)</li><li>- If somehow I manage to accept, I shouldn't be listed as a friend in my buddy list...</li></ul> <p>I guess the third check is not needed if we ensure the first two.</p>
