<b>Description</b>			
<p>We need some system that will allow other kind of auth systems (similar to openfire auth system, so you put some lib in a directory and you make a reference in the configuration to use that system). So people can develop it's own auth system (to connect kune to a LDAP system, for instance).</p> <p>Furthermore we are using the wave account system and I think that we have to implement something similar in Apache wave.</p> <p>Code to see:</p> <ul style="list-style-type: none"><li>- AccountStore.java interface in Apache Wave package org.waveprotocol.box.server.persistence</li><li>- UserManager.java interface in Kune source (but should we minimized).</li></ul> <p>Something similar to:</p> <p><a href="http://www.igniterealtime.org/builds/openfire/docs/latest/documentation/javadoc/org/jivesoftware/openfire/auth/AuthProvider.html">http://www.igniterealtime.org/builds/openfire/docs/latest/documentation/javadoc/org/jivesoftware/openfire/auth/AuthProvider.html</a></p> <p>This is how our openfire server uses kune as auth system.</p> <p>Original discussion:</p> <p><a href="http://kune.cc/?locale=en#!kune.lists.1226.10080">http://kune.cc/?locale=en#!kune.lists.1226.10080</a></p> <p><b>Note:</b> This issue is registered in the "proposing" section on FreedomSponsors. This means that if you need this issue that bad, you can go to <a href="http://www.freedomponsors.org/core/issue/214/allow-the-integration-of-custom-authentication-systems">http://www.freedomponsors.org/core/issue/214/allow-the-integration-of-custom-authentication-systems</a> and offer a few bucks for it.</p>
