Description			
<ul style="list-style-type: none">- Group X has a document, and spreads the URL of the document. E.g. http://kune.cc/#comunes.docs.427.341- If an anonymous user connects, the user sees: two avatars on top of each other; text without fonts/sizes (all uniform and big size font).- If a logged in user connects, but he/she is not member of the group X, the same result happens.- Only if a logged in user and member of the group opens the link, he/she can see properly the document.

I strongly suggest promoting this issue to Urgent Priority, as it discourages users from reading documents.
