<b>Description</b>			
<p>I know it may be too early, but I have a proposal from Manu, a colleague professor from uni.</p> <p>We can search for groups and users (in the search bar). However, we cannot search for keywords. That is, a classical search field where I would search for "agriculture" to see the public groups dealing with that. I don't even know if we'd want one of those (Facebook/Diaspora dont have... they rely on Google or friends for finding group-pages), but it might be interesting to consider it.</p>			

#### History

- Target version set to Candidate for next major release

Would be nice! Structure of any group could be complex and searching using keywords would be really helpful.
