Description			
When using the chat if you are working with more than one tag, think of an example where the chat is open only in the first tag. The thread breaks if somebody talks to you while you are in the newer tag with no chat open.

I can understand properly this bug. With tag, I think you mean "tab", but... Anyway how does this works in, for instance gmail? Try to open two tabs. Does not works kune like gmail with two tabs? I thinks so...

Anyway we need more info.
