

Kune - Defect #254

Local link detection fails when there is "locale"

04/21/2012 05:49 PM - Samer -

Description	
<p>When we click on a link such as http://kune.cc/#kune.docs.1111.959</p> <p>Kune detects its a local link and doesn't open a new tab. However, if the link includes a locale: http://kune.cc/?locale=es#kune.docs.1111.959</p> <p>it fails to detect it as local link and it opens in a new tab. I dont know if it happens only when the locale is different to your default locale.</p>
