<b>Description</b>			
In folders it'd be useful to show that there are "3 docs" inside. This is especially useful in tools such as Tasks, where we have predefined folders (e.g. "Long-term tasks") that might be empty. Locating which folders are empty save clicks.

Could be connected to #420, that is about folder date.  
I suggest to display the date of last modified doc.

It could be connected, yep, something like:

- empty folder: <empty>
- 1 doc in folder: <date last modif> + (1)
- 2 doc in folder: <date last modif> + (2)

...

In my opinion, organizing tasks in folders is a poor design choice. A filtering approach (e.g. like that of redmine) would be better. On another note, an empty folder shouldn't exist at all.
