<b>Description</b>			
If I click on "reply" or "click here to reply" empty message is created and I have to remove it then. Would be nice if: <ul style="list-style-type: none"><li>- empty messages are not created until you put something to it</li><li>- message is removed if you remove all the content</li></ul>

+1 for new empty msg.

For 2), we have a action button to delete a blip, so it is redundant with this auto-deletion fonctionnality.

1) correspond to a error (oops, I click on a button I don't want).

2) could not be an error.

So I not agreee 2).

If it is not difficult to implement I would do it. Just for a better user experience.

BTW: can I undo last changes if I have just changed the message and have not clicked 'done' yet? I didn't manage to undo changes.
