What exactly you is suggesting here?

Host torrents in kune or integrate external (torrent specific) search tools at him?

#2 - 03/10/2013 01:33 PM - Vicente J. Ruiz Jurado

The problem: Many of our users don't know how to use P2P tools

The proposal: to study ways to make this more user friendly integrating other P2P tools

The goal: allow to users & groups to exchange big files easily in a decentralized way

The mentioned goal is already achieved by torrents and other p2p networks, while the mentioned problem is a problem of education. So, I believe torrents are out of the scope of Kune and that they should stay out.
